

*******PUBLIC NOTICE*******

Village Residents and Businesses

Properties with Outdoor Sprinkler Systems

OR

Fire Suppression Systems

*******Your Cross-Connection Control Device *MUST BE* Inspected*******

**As of January 1, 2025, BSI Online is Managing the Village of Morton Grove
Backflow Prevention Inspection Program**

If you are a Village resident or business with an outdoor sprinkler system or fire suppression system, your backflow prevention assembly must be tested and certified every year to ensure that it is functioning properly. Backflow prevention assemblies, also referred to as cross-connection control devices, prevent contaminated water from the sprinkler system from backflowing into the water supply. Inspection of backflow prevention assemblies is required by the Illinois Environmental Protection Agency (IEPA) and the Village of Morton Grove in accordance with Municipal Code 7-4-10: Cross Connection Control and Ordinance #95-7. The Village of Morton Grove has partnered with BSI Online to assist in administering the Backflow Prevention Inspection Program. **If you have questions regarding the program or the notice of inspection you received in the mail, please direct all inquiries to BSI Online at 888-966-6050 or support@backflow.com.**

*****BSI Online will be in contact with you via letter outlining reporting requirements.*****
